Scott Hardware Co. Phone 748 GRAIN AND PROVISIONS.

Chicago, June 8,-The official statistics compiled by the government experts re-lating to the acreage sown to wheat in the United States and the condition of the crop on June 1 were made public fif-teen minutes before the end of the ses-sion of the local exchange. The condition of winter wheat was \$6.7, or nearly three points below that of one month ago, while points below that of one month ago, while the condition of spring wheat was esti-mated at 95.2, a trifle above the condition the corresponding time last year. The area sown to spring wheat was estimated at 18,391,000 acres, the largest acreage on

area sown to spring wheat was estimated at 18,391,000 acres, the largest acreage on record.

The loss of nearly three points in the winter crop was more than had been expected, and was the cause of active buying. There was also liberal purchases on the theory that the abandoned acreage would reduce the yield of winter wheat. Prices, which had slumped greatly earlier, radlied sharply. The market was decidedly strong at the staft owing to strength of foreign markets and no damage reports from Kansas, but weakened toward the end of the first hour on profit taking. The range for the day on July wheat was between 1.1834 and 1.2014. The close was strong, with July at 1.194/£1.1958.

The corn market opened strong, and the prices soon slumped sharply on profit taking. The market closed easy 1/2c higher to 3/26/2c lower, compared with Saturday's final figures.

Presentment of a bearish government crop report had a weakening effect on oats. The selling pressure was especially heavy in September. The market closed easy, 1/3c higher to 1/4c lower.

Provisions were firm early in the day, but later became easier on realizing sales. At the close prices were unchanged to 121/2/61.5c higher.

The leading futures ranged as follows:
